Citation

M Polansky. *Peer Review and Internet Medical Journals*. The Internet Journal of Academic Physician Assistants. 1996 Volume 1 Number 2.

Abstract

As the internet medium is rapidly expanding, more and more medical information is being disseminated by way of the net. The advantages to the utilization of the internet include the rapidity of the process from submission of the article (often by electronic mail) to the publication of the manuscript. This allows information which is current to clinical practice to be widely available for readership.

Many web-site are providing medical information to medical professionals, as well as the public. Some sites provide abstracts and abbreviated articles of previously reviewed and published works. Others provide articles without the benefit of peer-

review.

As a publication of Internet Scientific Publications, the Internet Journal of Academic Physician Assistants maintains a strict peer-review process for all original clinical manuscripts. As this medium for dissemination of clinical material broadens, the integrity of the peer-review process must be ensured. For readers of this journal, you will be assured accurate, up-to-date peer-reviewed manuscripts. It is also requested that physician assistants and other members of the medical profession interested in assisting with the peer-review process notify the editorial board.
