1291 Brookings Lane Sunnyvale, California 94087 USA

Sunnyvale, California, USA. Case Tracker for Perfusionists, the first relational database application designed exclusively for perfusionists to organize and report perfusion case information, is now available for the 1999-2000 reporting year.

With the simple push of a button, Case Tracker will generate summary perfusion case reports for personal use or hospital staff credential renewal, as well as the Clinical Activity Report required by the American Board of Cardiovascular Perfusion for annual recertification.

Case Tracker has many unique and special features:

- Operates on any personal computer (desktop or laptop) running Windows 95®, Windows 98®, Windows NT®, or MacOS®.
- Requires NO ADDITIONAL SOFTWARE to run
- Intelligent installation program automatically installs and prepares the program to run with a single click. (no complicated or confusing installation or set-up.
- Certified to be 'Year 2000' compliant
- Tracks procedures for all the reportable ABCP case codes as well as Cath Lab and Operating Room

'Standby' procedures (for complete activity tracking and reporting)

- Conforms to the latest ABCP reporting format (no worries about report format acceptance)
- "One-click" report generation: Create custom-sorted printouts of perfusion case activity for hospital staff credentialing, department reporting, activity documentation, or personal records. Generates the ABCP Clinical Activity Report, Coversheet, and 'Authorization for Release of Information' forms.
- Simple, intuitive graphical interface makes data entry and report creation fast and easy
- Exclusive IntelliMatrix™ technology monitors data entry to detect errors and assure records are correct and complete
- Automatic backup of your entered case data (data can be restored if hardware or operating system problems occur)

A fully functional version of Case Tracker for Perfusionists for the 1999-2000 reporting year (will run in demonstration mode until registered) is available for download at the Datamatrix web site: <http://www.datamatrixis.com>

Datamatrix products can now be ordered and registered online via an international secure ordering system (with service in 10 languages, 33 international currencies).
